In Appreciation of Grand Challenges Canada’s Peer Reviewers

On behalf of Grand Challenges Canada, we would like to take this opportunity to thank our peer reviewers.

The success and quality of the peer review process for Grand Challenges Canada's programs is critical in identifying **Bold Ideas with Big Impact™**. This is made possible by dedicated people who generously give their time and expertise to review applications. We recognize that these applications take a considerable amount of time to review. We very much appreciate the substantial effort each reviewer contributed to the review process and for graciously accepting our invitation to participate.

We would also like to thank the Canadian Institutes of Health Research (CIHR), whose staff members have done an excellent job administering the independent peer reviews according to international standards of excellence.

Grand Challenges Canada values the continued support of our peer reviewers as we move into the future.

Peter A. Singer, OC, MD, MPH, FRSC   Andrew Taylor, M.Sc.
Chief Executive Officer     Executive Vice President

About Grand Challenges Canada

Grand Challenges Canada is dedicated to supporting bold ideas with big impact in global health. We are funded by the Government of Canada through the Development Innovation Fund announced in the 2008 Federal Budget. We fund innovators in low- and middle-income countries and Canada. Grand Challenges Canada works with the International Development Research Centre (IDRC), the Canadian Institutes of Health Research (CIHR) and other global health foundations and organizations to find sustainable long-term solutions through integrated innovation - bold ideas which integrate science, technology, social and business innovation. Grand Challenges Canada is hosted at the Sandra Rotman Centre.

About Canada’s International Development Research Centre

The International Development Research Centre (IDRC) supports research in developing countries to promote growth and development. IDRC also encourages sharing this knowledge with
policymakers, other researchers and communities around the world. The result is innovative, lasting local solutions that aim to bring choice and change to those who need it most.

As the Government of Canada’s lead on the Development Innovation Fund, IDRC draws on decades of experience managing publicly funded research projects to administer the Development Innovation Fund. IDRC also ensures that developing country researchers and concerns are front and centre in this exciting new initiative.

www.idrc.ca

About Canadian Institutes of Health Research
The Canadian Institutes of Health Research (CIHR) is the Government of Canada’s health research investment agency. CIHR’s mission is to create new scientific knowledge and to enable its translation into improved health, more effective health services and products, and a strengthened Canadian health care system. Composed of 13 Institutes, CIHR provides leadership and support to more than 14,100 health researchers and trainees across Canada.

CIHR will be responsible for the administration of international peer review, according to international standards of excellence. The results of CIHR-led peer reviews will guide the awarding of grants by Grand Challenges Canada from the Development Innovation Fund.

About Sandra Rotman Centre
The Sandra Rotman Centre is based at University Health Network and University of Toronto. We develop innovative global health solutions and help bring them to scale where they are most urgently needed. The Sandra Rotman Centre hosts Grand Challenges Canada.
